Allowance or No Allowance?

Every year millions of children earn allowance for accomplishing chores around the house. However, many parents prefer not to reward their children with allowance.

First of all, many parents feel that allowance is a bad idea. Some believe that children are not responsible enough to manage their money. According to other children's parents, allowance gives to much liberty to spend money. Most importantly, those who appose allowance feel that kids should work around the house just to build responsibility.

The image shows a screenshot of a presentation slide. The slide has a blue background and the title "Main things to study" at the top. A white window titled "Take Screenshot" is overlaid on the slide, partially obscuring the text. The slide contains a bulleted list of topics. The system tray at the top right shows the date and time as "Wed Jul 22, 10:56 AM".

Main things to study

- Periodic table
- Protons +
- Nucleus (center)
- Elements
- Electron -
- Noble gas- element that hardly ever form compounds.

Welcome to the Sylvan Union School District's ePortfolio System

This site is a fully featured electronic portfolio, weblog and social networking system, connecting students, teachers and parents in the development of online learning communities. This tool provides you with the tools to set up a personal learning and development environment.

This tool will allow students to use technology to:

- Research
- Collaborate
- Create
- Network
- Present

In addition students will get valuable skills in utilizing technology as a learning tool to promote responsible, ethics, use of digital tools and media.

For more information you can read [About Mahara](#) or alternatively please feel free to contact us via email, [Sylvan Union School District](#).

Simple Place Value Application

The files listed below are examples of what can be done rather quickly in an application called Revolution. Revolution is a modern programming language that eliminates the need to memorize a cryptic programming language in order to create useful tools for your computer. If you remember the old applications HyperCard, SuperCard, or MetaCard, this application is the best, modern implementation of those applications. More sophisticated examples of what is possible with Revolution can be found here: <http://edutorica.blogspot.com/>

Feel free to download the application and give it a whirl!

Learning and Tools

My thoughts related to the use of technology in the Sylvan Union School District.

Why technology? ver 1.0

At my regular scheduled meeting with Martha and Dr. H., the question came up as to why we have computer labs in the classroom. This is an extremely important question, and one that has not been formalized or standardized across the district. Essentially, as a whole, the district has never said that all schools must have a computer lab. This question materialized after a conversation arose

Bill Kaulitz - lead vocals (born 1 September 1989)

Bill Kaulitz was born on September 1, 1989, in Leipzig, [East Germany](#). He was born to Simone Kaulitz, a freelance tailor, and Jörg Kaulitz. When he and his twin brother Tom were seven, their parents divorced. Their mother remarried Gordon Trümper, a guitarist from the German rock band Fatum. Their stepfather inspired the twins to begin their music careers.^[1] He began writing song lyrics at the age of seven,^[2] with his brother at the age of nine years old.^[3] He has stated that his biggest musical influence is German pop artist [Nena](#). Since the beginning of his career, he has done the voice for Arthur in the German version of the film, *Arthur und die Minimoys*.
